

watercolours _____

Here is a handy colour chart that can be used in many ways. One way is to make a colour chart for your paint tin. Cut a piece of lightweight watercolour paper, 90lb (190g) weight is ideal, to A4 size (21cm x 29.7cm) and print this page. Let the ink dry. If your printer inks are water soluble take care not to touch them with your brush when painting. Paint and label each square and cut to size to fit your paint tin. Your local stationery store will laminate it for you which makes it easy to clean and much more durable.
